The Keathley Canyon Connector expansion is part of the Discovery joint venture, which includes the Larose natural gas processing plant and Paradis fractionation facility. The pipeline will provide reliable and cost-effective deepwater gathering services.

- **Business Segment:** Natural Gas Services
- **Location:** Deepwater Gulf of Mexico
- **Scope:** An expansion of the Discovery natural gas gathering pipeline system in the deepwater Gulf of Mexico (see detailed project scope below)
- **Capacity:** More than 400 million cubic feet per day (MMcf/d)
- **Ownership:** A joint venture owned 40 percent by DCP Midstream Partners and 60 percent by Williams Partners (operator)
- **Projected in-service date:** Fourth quarter 2014

Project Scope: The Keathley Canyon Connector will be a 20-inch diameter, 215-mile subsea natural gas gathering pipeline for production from the Keathley Canyon, Walker Ridge and Green Canyon areas in the central deepwater Gulf of Mexico. It will originate in the southeast portion of the Keathley Canyon area and terminate into Discovery’s 30-inch diameter mainline near South Timbalier Block 283.
