SAFETY DATA SHEET

1. Identification

Product identifier  Produced Salt Water
Other means of identification
SDS number  9
Recommended use  By-Product
Recommended restrictions  None known.
Manufacturer / Importer / Supplier / Distributor information

Company name  DCP Midstream
Address  370 17 Street Suite 2500 Denver, CO 80202
Telephone  (303) 595-3331
E-mail  safety@dcpmidstream.com
Contact person  Mark Prewitt
Emergency phone number  CHEMTREC - 24 HOURS: 800-424-9300

2. Hazard(s) identification

Physical hazards  Not classified
Health hazards  Germ cell mutagenicity  Category 1B
                Carcinogenicity  Category 1A
OSHA hazard(s)  Not Classified

Label elements
Hazard symbol

Signal word  Danger
Hazard statement  May cause genetic effects. May cause cancer.

Precautionary statement
Prevention  Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves/protective clothing/eye protection/face protection.
Response  Not available.
Storage  Store locked up.
Disposal  Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazard(s) not otherwise classified (HNOC)  Not classified.

Supplemental Information  May contain an upper layer of flammable liquid and vapor hydrocarbons. Vapor accumulation can flash or explode when ignited.

3. Composition/information on ingredients

Mixture
Hazardous components

Composition comments
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

4. First-aid measures

**Inhalation**
Move to fresh air. If breathing is difficult, remove to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if any discomfort continues.

**Skin contact**
Remove contaminated clothing and shoes. Wash affected area with mild soap and water. Get medical attention if irritation develops and persists.

**Eye contact**
Immediately flush with plenty of water for at least 15 minutes. Get medical attention if irritation develops or persists.

**Ingestion**
Rinse mouth thoroughly. Get medical attention if any discomfort continues.

Most important symptoms/effects, acute and delayed
Not available

Indication of immediate medical attention and special treatment needed
Treat symptomatically. Be aware that symptoms of chemical pneumonia (shortness of breath) may occur several hours after exposure.

General information
Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

NFPA 704 Hazard Class
Health: 0
Flammability: 1
Instability: 0
(0-Minimal, 1-Slight, 2-Moderate, 3-Serious, 4-Severe)

Suitable extinguishing media
Extinguish with foam, carbon dioxide, dry powder or water fog.

Unsuitable extinguishing media
Not available.

Specific hazards arising from the chemical
Vapor accumulation can flash or explode when ignited.

Special protective equipment and precautions for firefighters
Self-contained breathing apparatus and full protective clothing must be worn in case of fire. Selection of respiratory protection for firefighting: follow the general fire precautions indicated in the workplace..

Fire-fighting equipment/instructions
Keep upwind. Containers close to fire should be removed or cooled with water. Use standard firefighting procedures and consider the hazards of other involved materials.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures
Stay upwind. Eliminate all ignition sources (no smoking, flares, sparks or flames in immediate area). Avoid inhalation of vapors and spray mist and contact with skin and eyes.
Wear suitable protective clothing, gloves and eye/face protection. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up

Remove sources of ignition. Beware of the explosion danger. Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Small Spills: Absorb spillage with non-combustible, absorbent material. Ensure that waste and contaminated materials are collected and removed from the work area as soon as possible in a suitably labeled container. Large Spills: Remove with vacuum trucks or pump to storage/salvage vessels. Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Wash area with soap and water.

Environmental precautions

Prevent spreading over a wide area (e.g. by containment or oil barriers). Do not contaminate water. Contact local authorities in case of spillage to drain/aquatic environment.

7. Handling and storage

Precautions for safe handling

Provide adequate ventilation. Avoid inhalation of vapors/mist and contact with skin and eyes. The product is extremely flammable, and explosive vapor/air mixtures may be formed even at normal room temperatures. Ground container and transfer equipment to eliminate static electric sparks. Vapors are heavier than air and may travel along the floor and in the bottom of containers. Use non-sparking hand tools and explosion-proof electrical equipment. Wear appropriate personal protective equipment. Immediately change contaminated clothes. Do not eat, drink or smoke when using the product. Observe good industrial hygiene practices. Use only bottom loading of tankers, in compliance with European legislation. Do not use compressed air for filling, discharging, or handling operations. Empty containers may contain flammable product residues.

Conditions for safe storage, including any incompatibilities

Store in a well-ventilated place. Follow rules for flammable liquids. Keep away from heat, spark, open flames and other sources of ignition. Store in a cool, dry place. Store in tightly closed original container. Keep away from food, drink and animal feeding stuffs. Store away from incompatible materials.

* - For sampling details, please see the source document.

### Exposure guidelines

#### US. ACGIH Threshold Limit Values

- Benzene (CAS 71-43-2) Can be absorbed through the skin.

#### US. California Code of Regulations, Title 8, Section 5155. Airborne Contaminants

- BENZENE (CAS 71-43-2) Can be absorbed through the skin.
- TOLUENE; TOLUOL (CAS 108-88-3) Can be absorbed through the skin.

#### US. Minnesota Hazardous Substances List (Minn. Rules 5206.0400).

- Toluene (CAS 108-88-3) Skin designation applies.

#### US. Rhode Island Hazardous Substances Right-to-Know Act (R.I. Gen. Laws Section 28-21-1 et. seq.)

- Benzene (CAS 71-43-2) Can be absorbed through the skin.
- Toluene (CAS 108-88-3) Can be absorbed through the skin.
- Xylene (CAS 1330-20-7) Can be absorbed through the skin.

### Individual protection measures, such as personal protective equipment

#### Eye/face protection

If risk of splashing, wear safety goggles or face shield.

#### Skin protection Hand protection

Wear protective gloves. Nitrile gloves are recommended, but be aware that the liquid may penetrate the gloves. Frequent change is advisable. Suitable gloves can be recommended by the glove supplier.

#### Other

Normal work clothing (long sleeved shirts and long pants) is recommended.
Respiratory protection
No personal respiratory protective equipment normally required. If airborne concentrations are above the applicable exposure limits, use NIOSH approved respiratory protection.

Thermal hazards
When material is heated, wear gloves to protect against thermal burns.

General hygiene considerations
Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Observe any medical surveillance requirements.

10. Stability and reactivity

Reactivity
The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability
Stable under normal temperature conditions.

Possibility of hazardous Reactions
Hazardous polymerization does not occur.

Conditions to avoid
Heat, flames and sparks. Elevated temperatures and incompatible materials.

Incompatible materials
Strong oxidizing agents.

Hazardous decomposition Products
Thermal decomposition or combustion may liberate carbon oxides and other toxic gases or vapors.

11. Toxicological information

Information on likely routes of exposure

Ingestion
May cause discomfort if swallowed.

Inhalation
In high concentrations, vapors and spray mists are narcotic and may cause headache, fatigue, dizziness and nausea.

Skin contact
Prolonged skin contact may cause temporary irritation.

Eye contact
Direct contact may irritate.

Symptoms related to the physical, chemical and toxicological characteristics
Dry skin. Irritation. Drowsiness and dizziness.

Information on toxicological effects

Acute toxicity
Breathing of high concentrations may cause dizziness, light-headedness, headache, nausea and loss of coordination. Continued inhalation may result in unconsciousness.

Xylene (CAS 1330-20-7)

**Acute**

*Oral*

LD50 Rat 4300 mg/kg

Skin corrosion/irritation Not available.

Serious eye damage/eye irritation Not available.

Respiratory sensitization Not classified.

Skin sensitization Not a skin sensitizer.

Germ cell mutagenicity May cause genetic defects.

Carcinogenicity May cause cancer.

*IARC Monographs. Overall Evaluation of Carcinogenicity*

Benzene (CAS 71-43-2) 1 Carcinogenic to humans.

Toluene (CAS 108-88-3) 3 Not classifiable as to carcinogenicity to humans.

Xylene (CAS 1330-20-7) 3 Not classifiable as to carcinogenicity to humans.

**NTP Report on Carcinogens**

Benzene (CAS 71-43-2) Known To Be Human Carcinogen.

Benzene (CAS 71-43-2) Cancer hazard.

Reproductive toxicity Not available.

Specific target organ toxicity - single exposure Not available.

Specific target organ toxicity - repeated exposure Not available.

Aspiration hazard Not available.

Chronic effects Contains benzene. Human epidemiology studies indicate that prolonged and/or repeated overexposure to benzene may cause damage to the blood-producing system and serious blood disorders, including leukemia. Animal tests suggest that prolonged and/or repeated overexposure to benzene may damage the embryo/fetus. The relevance of these animal studies to humans has not been fully established.

**12. Ecological information**

Ecotoxicity The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Sodium chloride (CAS 7647-14-5)

Aquatic

Crustacea EC50 Water flea (Daphnia magna) 340.7 - 469.2 mg/l, 48 hours

Toluene (CAS 108-88-3)

Aquatic

Crustacea EC50 Water flea (Daphnia magna) 5.46 - 9.83 mg/l, 48 hours

Fish LC50 Coho salmon, silver salmon (Oncorhynchus kisutch) 5.5 mg/l, 96 hours

Xylene (CAS 1330-20-7)

Aquatic

Fish LC50 Rainbow trout, Donaldson trout (Oncorhynchus mykiss) 8 mg/l, 96 Hours

Persistence and degradability

The degradability of the product has not been stated. The product meets the definition of the International Oil Pollution Compensation (IPOC) Fund as being a “non-persistent” oil. Bioaccumulative potential.

Partition coefficient n-octanol / water (log Kow)

Benzene 2.13
Toluene 2.73
Xylene 3.2

Mobility in soil

Not available.

Other adverse effects

Not established.

13. Disposal considerations

Disposal instructions

Dispose in accordance with all applicable regulations. Do not discharge into drains, water courses or onto the ground.

Local disposal regulations

Dispose of in accordance with local regulations.

Hazardous waste code

Waste codes should be assigned by the user based on the application for which the product was used.

Waste from residues / unused products

Dispose in accordance with all applicable regulations.

Contaminated packaging

Since emptied containers retain product residue, follow label warnings even after container is emptied.

14. Transport information

DOT

Not regulated as a hazardous material by DOT.

IATA

Not regulated as a dangerous good.

IMDG

Not regulated as a dangerous good.

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code

No information available
15. Regulatory information

US federal regulations

This product is a “Hazardous Chemical” as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

All components are on the U.S. EPA TSCA Inventory List.

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D)
